The Collaborative Research Center Transregio ReceptorLight of the Deutsche Forschungsgemeinschaft is pleased to announce the Second International ReceptorLight Symposium.

This symposium will cover numerous topics from all fields of high-end light microscopy and its usability to study the function of various membrane receptors. Besides invited guest speakers, members of ReceptorLight will present their own work on microscopic techniques and research on receptor function in talks and posters.

The number of participants is limited.

Scientists who are interested to attend the Symposium are encouraged to register as soon as possible at TRR166@med.uni-jena.de.

Fee for non-TRR166 members will be 100 €.

Invited guest speakers:

- Nils Brose, Germany
- Meritxell Canals, UK
- Daniel Choquet, France
- Christoph Fahlke, Germany
- Thomas Gudermann, Germany
- Mike Heilemann, Germany
- Stephen Hill, UK
- Dagmar Klostermeier, Germany
- Rob Leurs, Netherlands
- Andreas Reiner, Germany
- Miriam Stöber, US
- Mark Wallace, UK
